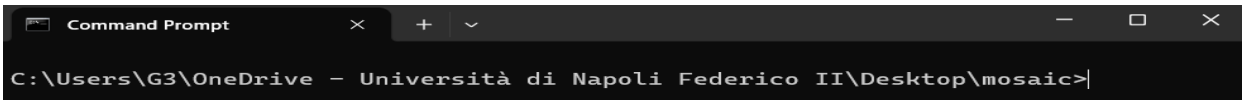
First step: Installing Eclipse MOSAIC

‘’’’



Then we run this prompt and simulation would be open successfully and we should see some vehicles move in simulation.

mosaic.bat -s HelloWorld -v

,,,

Third step :
now we want to see what would happen, if 50% vehicles can communicate with each other. For doing this you should overwrite the mapping_config (JSON) which is located at \mosaic\scenarios\HelloWorld\mapping with this script: 50_cam_

Additionally in order to observe simulation with realistic speed you can use this prompt:

mosaic.bat -s HelloWorld -v -b 1

‘’’’
